José Ángel Durán Ramírez

SOFTWARE DEVELOPMENT AND MANAGEMENT ENGINEER

jd43573@gmail.com | +52 614 463 5789 | Torreón, Coahuila, Mexico

PROFESSIONAL SUMMARY

Software Development and Management Engineer with experience building mobile and web applications, specializing in iOS with Swift and UIKit. Experienced in REST API integration, authentication, databases, digital payments, and developing features for service and e-commerce platforms. Focused on building functional solutions, collaborating with cross-functional teams, and learning new technologies.

PROFESSIONAL EXPERIENCE

Eva Tech — Software Engineer | *Dec. 2025 – Oct. 2026*
iOS Application Development | Client: B-Place

- Developed the native B-Place app with Swift and UIKit, focused on purchasing products and booking services.
- Integrated REST APIs, authentication, and session management, along with product, category, shopping cart, and order features.
- Led end-to-end development native BPlace iOS app with Swift and UIKit, enabling users to purchase products and book services.
- Implemented scheduling and service management, reviews, notifications, business profiles, and Stripe payment integration for secure in app payments.
- Launched the first production version used by ~50 early users, validating the app concept and main user flows.

Eva Tech — iOS Developer | *Dec. 2025 – Oct. 2026*
B-Place Negocios

- Developed features that let businesses manage products, services, schedules, appointments, and orders.
- Implemented customer chat, Stripe payments, notifications, maps and location services, plus charts for statistics.

Grupo ARRO — Intern | *May 2024 – Aug. 2024*
Web Development with Angular

- Developed a web application for long-term house and room rentals, including online payments.

Universidad Tecnológica de Torreón — iOS Developer | *May 2024 – Aug. 2025*

- Developed an app to manage a veterinary clinic, with a pet CRM, accessory shopping, real-time tracking, lost-pet reports, chat, and profiles.

EDUCATION

Bachelor of Engineering in Software Development and Management | *Sep. 2024 – Apr. 2026*
Universidad Tecnológica de Torreón · Torreón, Coahuila

Associate Degree (Técnico Superior Universitario) in Multiplatform Software Development | *Sep. 2022 – Aug. 2024*
Universidad Tecnológica de Torreón · Torreón, Coahuila

FEATURED PROJECTS

B-Place
iOS · Swift · UIKit · REST APIs · Stripe
Product and service marketplace with payments, chat, notifications, reviews, and order management.

B-Place Negocios
iOS · Swift · UIKit · REST APIs
Business management platform with catalog, service, schedule, appointment, order, payment, and statistics management.

PWA Unbloga
Angular · Frontend · PWA · REST APIs · WebSocket
Unbloga is a Progressive Web App (PWA) for tracking and socially recommending manga, inspired by the user experience of Letterboxd. Built with a modern Angular frontend and a robust Laravel REST API, the platform allows manga enthusiasts to keep a reading log, rate chapters or volumes, write reviews, and create custom lists. As an optimized PWA, it offers offline-first support and can be installed natively on mobile devices.

MONIPET

iOS · Swift · UIKit · REST APIs · WebSocket · Payments · MapKit

An all-in-one iOS platform for pet management, responsible adoption, and IoT monitoring. The application integrates GPS tracking and activity sensors with interactive maps, an e-commerce marketplace for smart accessories, a veterinary appointment scheduler, and real-time chat for communication between users, shelters, and service providers.

Smart Parking Management App (Android / IoT)

Android · Frontend · PWA · REST APIs · WebSocket

B2B solution for the real-time management and monitoring of commercial parking facilities. The platform integrates with weight sensors for automated space control and vehicle registration, and includes a security module with early-warning alerts for gas leaks and loud noises.

TECHNICAL SKILLS

Languages: Swift, PHP, C#, Java, Python, JavaScript, TypeScript

Frameworks & Technologies: UIKit, iOS, Android, Angular, Laravel, REST APIs, JSON, Stripe, Firebase (basic)

Tools & Data: Xcode, Visual Studio, Visual Studio Code, Git/GitHub, MySQL, SQL and NoSQL databases, Figma (basic)

LANGUAGES & INTERESTS

Languages: Spanish (native), English (intermediate). **Interests:** Volleyball and basketball.
